

Whatcom

COMMUNITY COLLEGE

Math Transcript Placement

A goal of the Whatcom Community College math department is to encourage success in mathematics by helping students identify the right math placement. **Students with recent local high school transcripts should place with the following charts.**

Notes:

- The high school transcript placement chart may be used to determine math placement.
- Students in AP classes should take the AP exam and consult the AP score to determine if credit can be earned from the AP score. If credit cannot be earned through the AP score, consider using the chart for placement.
- College in the High School courses on a **high school** transcript should be evaluated as a standard high school math course using the math placement chart, since not all students will be awarded college credit. A grade of D or better in a College in the High School course on an official **college transcript** will be accepted as course credit.
- If a student has taken only one semester of a math class, please use a previously completed math class when looking at this chart.
- There is no averaging of grades. A student with an A and C in each semester of a year-long course would look at “C” (each semester)” placement.

High School Transcript Placement Available for:

- [Bellingham HS](#)
- [Blaine HS](#)
- [Burlington-Edison HS](#)
- [Ferndale HS](#)
- [Lynden HS](#)
- [Lynden Christian HS](#)
- [Meridian HS](#)
- [Mt. Baker HS](#)
- [Nooksack Valley HS](#)
- [Sehome HS](#)
- [Squalicum HS](#)
- [Windward HS](#)

Advisors are available to help you figure out your options and explore your math goals.

Completed within 1 year example: Completed June 2018 – placement valid through September 2019.

Completed within 2 years example: Completed June 2018 – placement valid through September 2020.
